

NSF employees, IPAs and contractors with access to sensitive and Personally Identifiable Information (PII), specifically Social Security Numbers (SSN), are responsible for avoiding inappropriate access, use, or disclosure of any kind and must follow proper NSF methods of storage and transmission for PII data. The rules of behavior detail the responsibilities and expectations for all individuals with access to sensitive information with particular attention to PII. The rules of behavior supplement existing NSF policy.

RESPONSIBILITY / ACCOUNTABILITY REQUIREMENTS

- 1 Users should only use systems, software, and data for which they have authorization and use them only for official government business or in accordance with the Personal Use Policy for NSF's Technology and Communication Resources.
- 2 Users with access to systems and data that utilize PII, specifically SSNs, must view and access this information only for the purposes for which use of the data is intended.
- 3 Users must protect confidential and/or sensitive information from disclosure.
- 4 Users shall not store sensitive information on portable devices such as laptops, PDAs and USB drives or on remote/home systems unless they have written authorization and encryption is employed.
- 5 Users shall not transmit SSNs via e-mail.
- 6 Users shall follow all aspects of the NSF Password Policy.
- 7 Where possible, all records containing sensitive information should be stored on network drives with access limited to those individuals or entities that require access to perform a legitimate Foundation job function.
- 8 All removable or transportable media (e.g., paper forms, reports, cassettes, CDs, USB drives, etc.) containing sensitive information must be secured when not in use. Reasonable security measures depend on the circumstances, but may include locked file rooms, desks, cabinets and encryption.
- 9 Subject to applicable document retention policies or unless required by law, when no longer required, paper documents and electronic media containing sensitive information will be destroyed or disposed of using methods designed to prevent subsequent use or recovery of information.
- 10 Users must report security incidents, or any incidents of suspected fraud, waste or misuse of NSF systems to appropriate officials.
- 11 I understand that failure to comply with the Rules of Behavior or other requirements of NSF policy may result in disciplinary action, sanctions, personal liability, and/or civil or criminal penalties.

NSF has taken steps to secure sensitive information within corporate databases. NSF employees, IPAs and contractors that have access to retrieve sensitive information must adhere to these rules. The rules are renewed annually.

I acknowledge receipt of, understand my responsibilities, and will comply with the Sensitive Information Rules of Behavior.
